Query usage — Prompt: 6 · Total: 6

TEXT score: 0.853 · rerank: 1.000

RAG means Retrieval-Augmented Generation

lang: dan · encoding: UTF-8 · source: text-input

Summarize

TEXT score: 0.800 · rerank: 1.000

RAG is an AI framework that improves large language model (LLM) accuracy by fetching facts from external data sources before generating a response

lang: sco · encoding: UTF-8 · source: text-input

Summarize

TEXT score: 0.787 · rerank: 0.900

RAG connects to private company files, databases, or live web pages that the LLM was never trained on

25°C Partly cloudy

10:53 PM 06-09-2026

Summarize

TEXT score: 0.773 · rerank: 0.900

RAG combines an information search step with text generation, acting like an open-book exam for the AI

lang: en · encoding: UTF-8 · source: text-input

Summarize

TEXT score: 0.759 · rerank: 0.900

RAG lowers the chance of the AI making up facts by grounding answers in real, verified documents

lang: en · encoding: UTF-8 · source: text-input

Summarize

TEXT score: 0.531 · rerank: 0.250

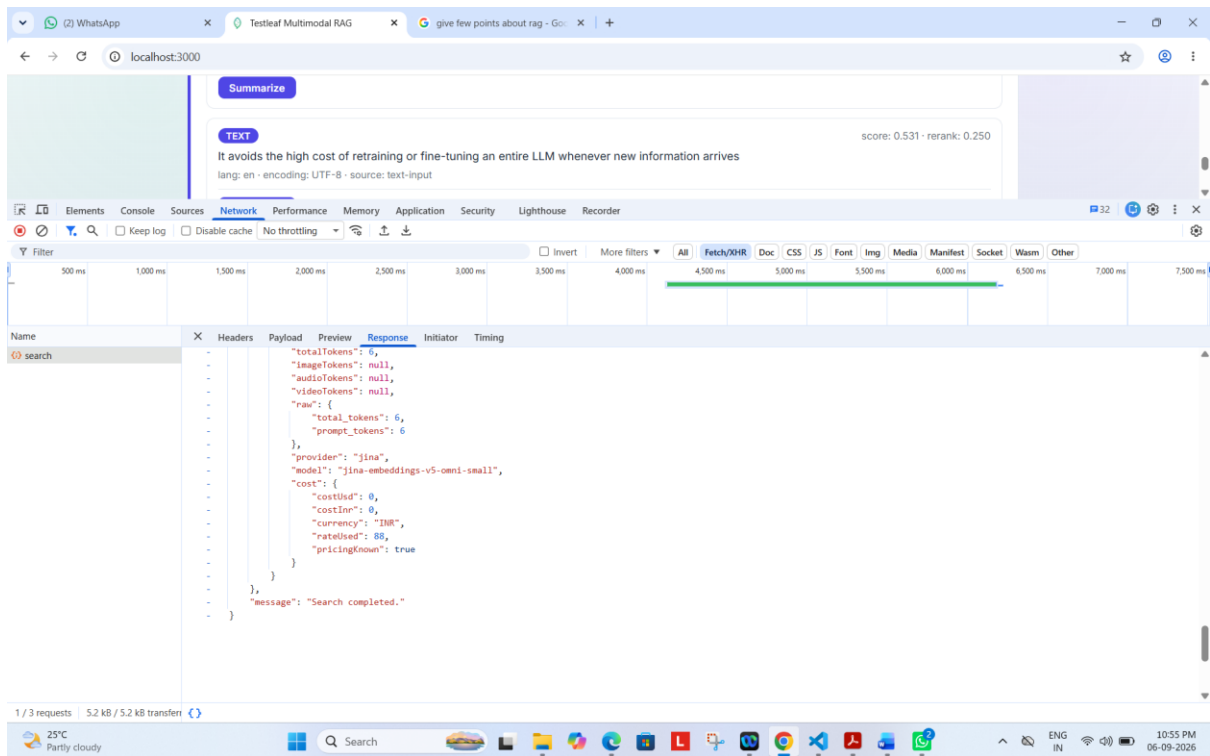

It avoids the high cost of retraining or fine-tuning an entire LLM whenever new information arrives

lang: en · encoding: UTF-8 · source: text-input
