The screenshot shows a REST client interface for a 'Test Case Generator RAG - Backend-June' API. The interface displays a POST request to '/api/generate-testcases' with a large JSON body. The response is a 200 OK status with a JSON body containing test case details.

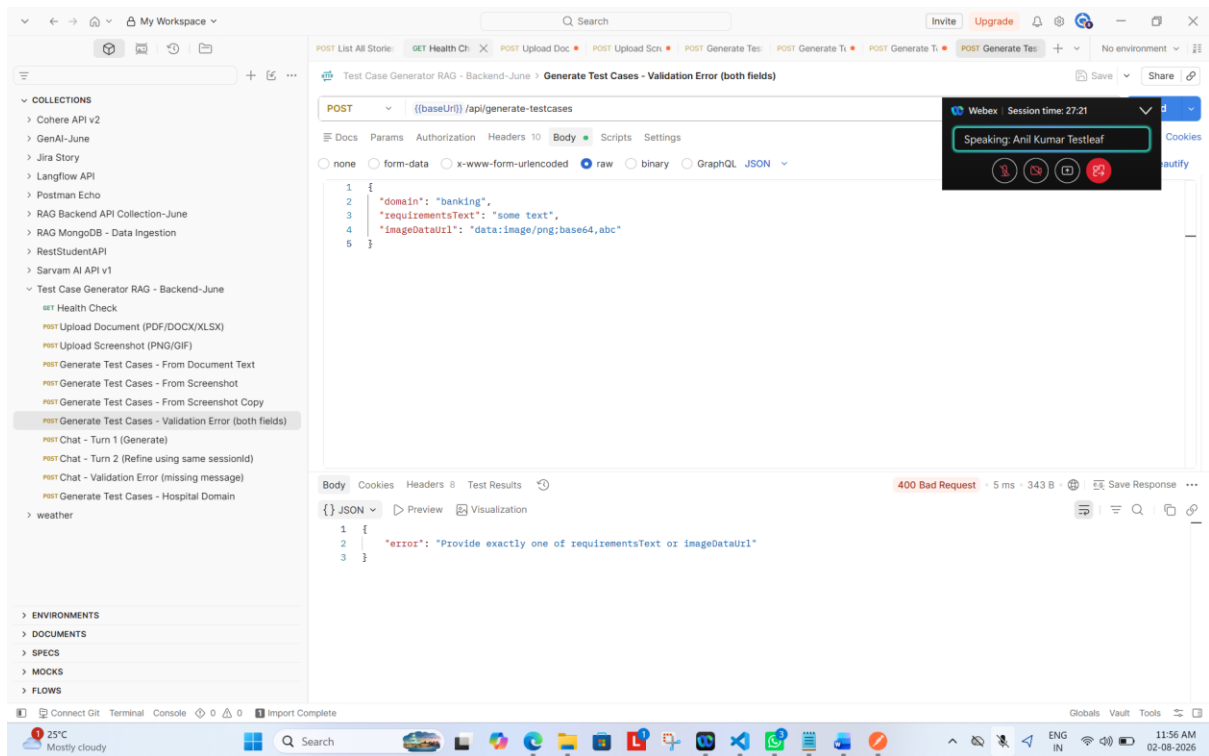

Request:

```
POST /api/generate-testcases
```

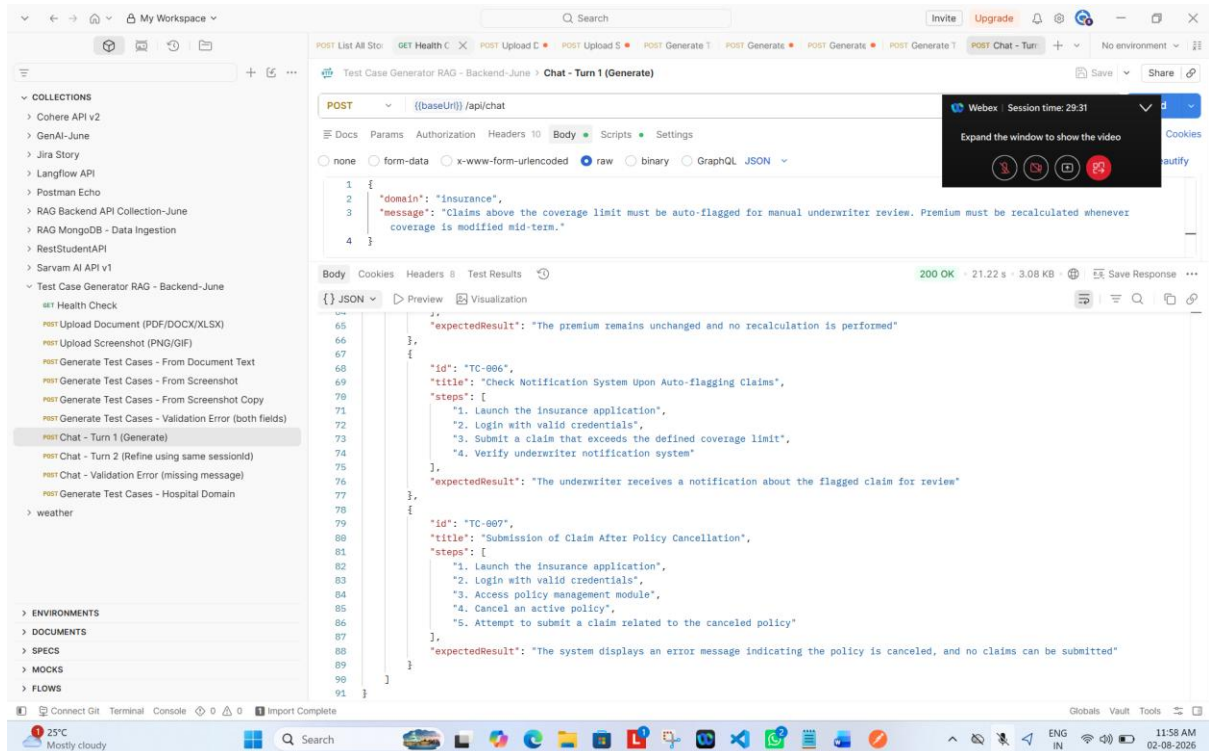

Response:

```
{
  "status": "success",
  "message": "Test cases generated successfully.",
  "testCases": [
    {
      "id": "TC-002",
      "title": "Verify emergency filter functionality",
      "steps": [
        "Open the doctor dashboard.",
        "Apply the 'Emergency' filter."
      ],
      "expectedResult": "Only patients with critical priority are visible."
    }
  ]
}
```
