

Rag –

The screenshot shows the RAG Pipeline web application interface. The main content area displays a JSON schema for a test case, with fields for 'success', 'response', 'analysis', 'userStoryTitle', 'userStoryModule', 'existingCoverageCount', 'gapIdentified', and 'newTestCases'. The 'test-prompt' field is highlighted in the sidebar. The bottom of the screen shows a Windows taskbar with various application icons and system status indicators.

The screenshot shows the RAG Pipeline web application interface. The main content area displays a list of generated test cases, including 'Positive Flow - Valid Report Sent via WhatsApp', 'Negative - Patient Consent Not Provided', 'Edge - Invalid WhatsApp Number Format', 'Negative - WhatsApp Service Down (Simulated)', 'Edge - Link Expiration Enforcement', 'Positive - PDF Encryption Verification', 'Negative - Unauthorized Technician Attempts Send', and 'Positive - Batch Sending of Multiple Reports'. The 'test-prompt' field is highlighted in the sidebar. The bottom of the screen shows a Windows taskbar with various application icons and system status indicators.

Muti select dropdown with metrics list populated from deepeval.

The screenshot shows the RAG Pipeline interface with the 'Test Case Quality Metrics Evaluation' menu open. The menu includes the following options:

- ☒ FAITHFULNESS
- ☒ CONTEXTUAL PRECISION
- ☒ CONTEXTUAL RECALL
- ☒ CONTEXTUAL RELEVANCY
- ☒ PII LEAKAGE
- ☒ BIAS

The interface also shows a sidebar with navigation options: files (Test Cases or User Stories), Embeddings & Store, Query Preprocessing, Vector Search, BM25 Search, and Hybrid Search. The main content area displays the 'Test Case Quality Metrics Evaluation' section with a 'Select Test Case to Evaluate' dropdown set to 'Positive Flow - Valid Report Sent via WhatsApp' and an 'EVALUATE' button. The bottom of the interface shows a network log with 8/15 requests and a system tray with the date 05-09-2026.

The screenshot shows the RAG Pipeline interface with the 'Test Case Quality Metrics Evaluation' menu open. The menu includes the following options:

- ☒ PII LEAKAGE

Evaluation Results for: Positive Flow - Valid Report Sent via WhatsApp

CONTEXTUAL RELEVANCY

50.0%

The score is 0.50 because the retrieval context contains several unrelated items such as "Transfer Request within hospital", "Transactions - Dashboard - Dashboard tab", and "Patients Awaiting for Initial Assessment", which do not address WhatsApp delivery, while only a few generic terms like "Diagnostic & Imaging report" or "Investigation report of patients" hint at diagnostics but lack specifics about secure WhatsApp transmission, resulting in a moderate relevance.
