

Import the spec through url

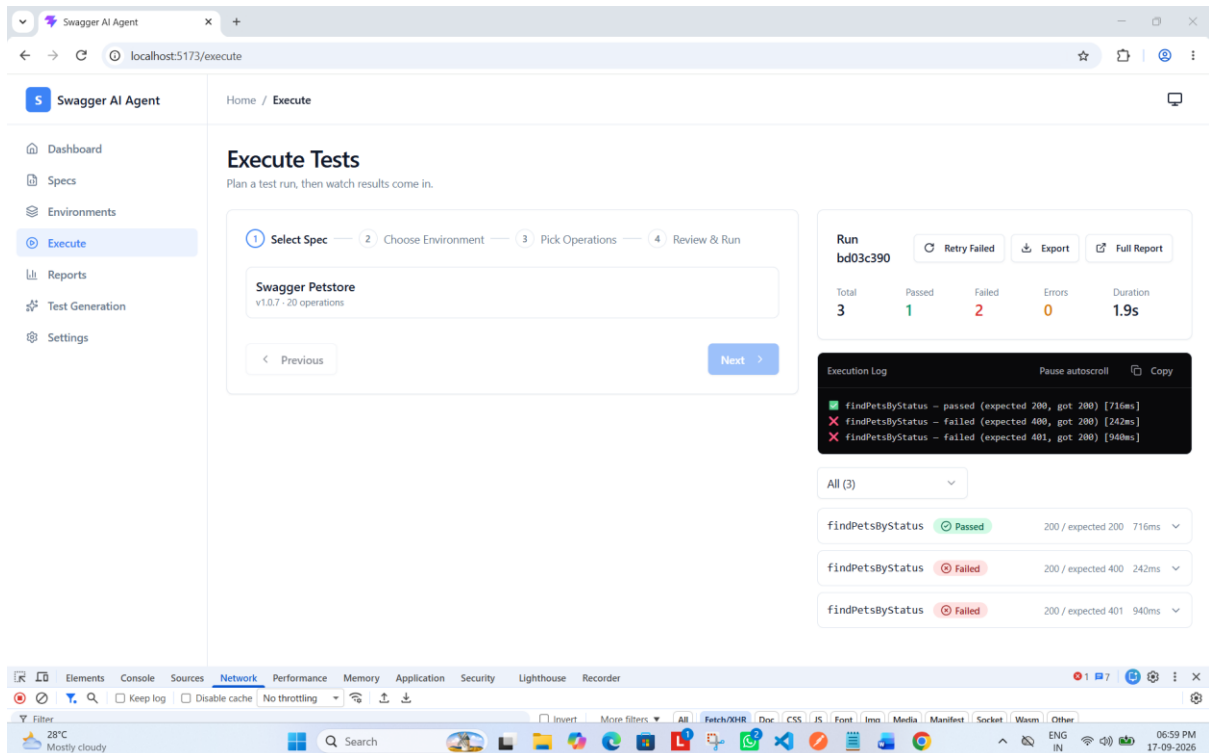

The screenshot shows the Swagger AI Agent interface with the Swagger Petstore - OpenAPI 3.0 spec imported via URL. The interface includes a sidebar with navigation options like Dashboard, Specs, Environments, Execute, Reports, Test Generation, and Settings. The main area displays the spec details, including the title "Swagger Petstore - OpenAPI 3.0" and the version "v1.0.27". The spec is imported from the URL "localhost:5173/specs/fd58fe27-72fc-461e-8577-182e89275842". The spec content is visible in the "Response" tab, showing the OpenAPI 3.0 structure with a title, version, and operation count.

The main area displays the spec details, including the title "Swagger Petstore - OpenAPI 3.0" and the version "v1.0.27". The spec is imported from the URL "localhost:5173/specs/fd58fe27-72fc-461e-8577-182e89275842". The spec content is visible in the "Response" tab, showing the OpenAPI 3.0 structure with a title, version, and operation count. The spec details are expanded, showing the following operations:

- POST /pet**: Add a new pet to the store.
- PUT /pet**: Update an existing pet.
- GET /pet/findByStatus**: Finds Pets by status.
- GET /pet/findByTags**: Finds Pets by tags.
- GET /pet/{petId}**: Find pet by ID.
- POST /pet/{petId}**: Updates a pet in the store with form data.
- DELETE /pet/{petId}**: Deletes a pet.
- POST /pet/{petId}/uploadImage**: Uploads an image.
- GET /store/inventory**: Returns pet inventories by status.
- POST /store/order**: Place an order for a pet.

Test generation –

The screenshot displays the Swagger AI Agent web interface for test generation. The browser address bar shows `localhost:5173/testgen`. The interface includes a sidebar with navigation links: Dashboard, Specs, Environments, Execute, Reports, Test Generation (active), and Settings.

The main section is titled "Test Generation" with the subtitle "Generate ready-to-run Jest + Axios test suites from your spec." It contains a configuration panel on the left and a code preview on the right.

Configuration Panel:

- Spec:** Swagger Petstore (v1.0.7)
- Operations:** All, By Tag (selected). Tags: pet, store (selected), user.
- Options:**
 - ☐ Include negative tests
 - ☐ Include auth tests
 - ☐ Include boundary tests
- Framework:** Jest + Axios
- Generate Tests:** A blue button to generate the test suite.

Generated Test Code:

```
1 const axios = require('axios');
2
3 // Generated test suite for Swagger Petstore (1.0.7)
4 const BASE_URL = process.env.BASE_URL || "https://petstore.swagger.io/v2";
5
6 describe("store", () => {
7   it("Happy path: GET /store/inventory", async () => {
8     const response = await axios.get(`${BASE_URL}/store/inventory`);
9     expect(response.status).toBe(200);
10  });
11
12   it("Happy path: POST /store/order", async () => {
13     const response = await axios.post(`${BASE_URL}/store/order`, {
14       "id": 1,
15       "petId": 1,
16       "quantity": 1,
17       "shipDate": "2024-01-01T00:00:00Z",
18       "status": "placed",
19       "complete": true
20     });
21     expect(response.status).toBe(200);
22   });
23
24   it("Happy path: GET /store/order/{orderId}", async () => {
25     const response = await axios.get(`${BASE_URL}/store/order/1`);
26     expect(response.status).toBe(200);
27   });
28 });
```

The bottom of the image shows a Windows taskbar with the system clock at 07:01 PM on 17-09-2026.
